Love's Executioner-Irvin D. Yalom 2013-04-04 Love's Executioner offers us the humane and extraordinary insight of renowned psychiatrist Irvin D. Yalom into the lives of ten of his patients - and through them into the minds of us all Why was Saul tormented by three unopened letters from Stockholm? What made Thelma spend her whole life raking over a long-past love affair? How did Carlos's macho fantasies help him deal with terminal cancer? In this engrossing book, Irvin Yalom gives detailed and deeply affecting accounts of his work with these and seven other patients. Deep down, all of them were suffering from the basic human anxieties - isolation, fear of death or freedom, a sense of the meaninglessness of life - that none of us can escape completely. And yet, as the case histories make touchingly clear, it is only by facing such anxieties head on that we can hope to come to terms with them and develop. Throughout, Dr Yalom remains refreshingly frank about his own errors and prejudices; his book provides a rare glimpse into the consulting room of a master therapist. Reviews: 'Dr Yalom demonstrates once again that in the right hands, the stuff of therapy has the interest of the richest and most inventive fiction' Eva Hoffman, New York Times 'These remarkably moving and instructive tales of the psychiatric encounter bring the reader into novel territories of the mind - and the landscape is truly unforgettable' Maggie Scarf 'Love's Executioner is one of those rare books that suggests both the mystery and the poetry of the psychotherapeutic process. The best therapists are at least partly poets. With this riveting and beautifully written book, Irvin Yalom has joined their ranks' Erica Jong 'Inspired ... He writes with the narrative wit of O. Henry and the earthy humor of Isaac Bashevis Singer' San Francisco Chronicle 'These stories are wonderful. They make us realize that within every human being lie the pain and the beauty that make life worthwhile' Bernie S. Siegel 'This is an impressive transformation of clinical experience into literature. Dr Yalom's case histories are more gripping than 98 percent of the fiction published today, and he has gone to amazing lengths of honesty to depict himself as a realistic flesh-and-blood character: funny, flawed, perverse, and, above all, understanding' Phillip Lopate 'I loved Love's Executioner. Dr Yalom has learned something that fiction writers learned years ago - that people's mistakes are a lot more interesting than their triumphs' Joanne Greenberg About the author: Irvin D. Yalom is Professor Emeritus of Psychiatry at the Stanford University School of Medicine. As well as an award-winning psychiatrist and psychotherapist, he is an extremely prolific author. His many other works include The Gift of Therapy, Staring at the Sun, When Nietzsche Wept, The Theory and Practice of Group Psychiatry, The Schopenhauer Cure, Lying on the Couch, Momma and the Meaning of Life, Existential Psychotherapy, I'm Calling the Police, Inpatient Group Psychotherapy, Every Day Gets a Little Closer and The Spinoza Problem.

Staring at the Sun-Irvin D. Yalom 2010-06-10 Written in Irv Yalom's inimitable story-telling style, Staring at the Sun is a profoundly encouraging approach to the universal issue of mortality. In this magisterial opus, capping a lifetime of work and personal experience, Dr. Yalom helps us recognize that the fear of death is at the heart of much of our anxiety. Such recognition is often catalyzed by an "awakening experience"—a dream, or loss (the death of a loved one, divorce, loss of a job or home), illness, trauma, or aging. Once we confront our own mortality, Dr. Yalom writes, we are inspired to rearrange our priorities, communicate more deeply with those we love, appreciate more keenly the beauty of life, and increase our willingness to take the risks necessary for personal fulfillment.

Rebuilding Shattered Lives-James A. Chu 1998-04-30 In Rebuilding Shattered Lives, James A. Chu, MD, describes a proven approach to the assessment and treatment of post-traumatic and dissociative disorders developed at the Dissociative Disorders and Trauma Program at McLean Hospital and Harvard Medical School. Drawing on his extensive empirical research and more than a decade's clinical experience specializing in treating survivors of severe abuse, Dr. Chu also offers valuable insights into all the major areas of trauma-related

symptomatology and provides the most detailed explanation of dissociative theory currently in print. And, with the help of numerous vignettes and case examples, he clearly illustrates common clinical dilemmas encountered when dealing with survivors of severe abuse as well as the most effective techniques for resolving them. *Rebuilding Shattered Lives* is an important working resource for mental health workers of all levels of experience. Throughout, the writing style is clear, and complex theories are explained with an emphasis on how they provide the conceptual basis for a rational, responsible, and safe approach to treatment.

Fishhead-Irvin S. Cobb 2016-08-01 During his lifetime Irvin S. Cobb was one of the most celebrated writers in American literature, though nowadays he is almost forgotten, apart perhaps from his Lovecraft connection. Irvin Shrewsbury Cobb was born in Paducah, Kentucky on the 23rd June, 1876. His father, unable to cope with the death of his own father, succumbed to alcoholism when Cobb was only sixteen. As a result, Cobb's education came to an end and he started work, first on the Paducah Daily News, then the Louisville Evening Post. By 1904 Cobb's career in journalism was doing so well that he moved to New York, where he would go on to spend the rest of his life, starting work at the Evening Sun, though it wasn't long before an assignment to cover the Russian-Japanese peace conference in Portsmouth, New Hampshire so impressed Joseph Pulitzer that he offered Cobb a job at the New York World, where he became the highest-paid staff reporter in the United States. In 1911 Cobb moved to the Saturday Evening Post. Three years later he was asked to cover the Great War. Amongst the many stories he wrote while there were the exploits of the Harlem Hellfighters, a unit of black American soldiers who had gone on to earn distinction for their courage and discipline, which Cobb celebrated in his book *The Glory of the Coming*. Besides his prolific work as a journalist, Cobb's fame largely came from his humorous stories, which were published in the leading magazines of his day, and collected in numerous books during his lifetime. But, though he was best known as a humourist, he did have a darker side, exemplified by the tales collected in this volume. Two of the most famous succeeded in catching the attention of H. P. Lovecraft. It is claimed that *Fishhead* influenced Lovecraft's *The Shadow Over Innsmouth*. And there is certainly no doubt that Lovecraft was favourably impressed with this tale. In his groundbreaking essay, *Supernatural Horror in Literature*, Lovecraft wrote: "Fishhead, an early achievement, is banefully effective in its portrayal of unnatural affinities between a hybrid idiot and the strange fish of an isolated lake..." The *Unbroken Chain* gave Lovecraft the key idea behind *The Rats in the Walls*, though in all other respects the two tales are totally different. Besides writing and journalism, Cobb's career extended to Hollywood, where legendary director, John Ford, made two films based on his books: *Judge Priest* (1934) and *The Sun Shines Bright* (1953). Other films included *Peck's Bad Boy* (1921), starring Jackie Coogan, and *The Woman Accused* (1933), with a young Cary Grant. Cobb also did a stint at acting himself, appearing in ten movies altogether, including *Pepper*, *Everybody's Old Man* (1936), *Steamboat Round the Bend* (1935) and *Hawaii Calls* (1938). It's a sign of the prominence he had achieved that in 1935 he was invited to host the 7th Academy Awards. Other than the tales that inspired Lovecraft, Cobb also wrote some brilliantly dark stories that culminate in a kind of sadistic irony. They are some of the finest conte cruel ever written. Amongst the best of these is the final story in this collection: *Faith, Hope, and Charity*, whose protagonists, as is often the case in Cobb's stories, struggle against fates that are not only pre-ordained but are horrendously appropriate! It must be added his hapless victims are far from blameless. What fates await them under Cobb's pen have most definitely been brought upon them by themselves! Through most of the tales there is a wry sense of humour, so wry, in fact, that it never detracts from the impact at the end; indeed, it often adds to and embellishes it! I hope you enjoy reading these stories as much as I did and share with me the conviction that it is high time they were revived.

Florynce "Flo" Kennedy-Sherie M. Randolph 2018-02-01 Often photographed in a cowboy hat with her middle finger held defiantly in the air, Florynce "Flo" Kennedy (1916–2000) left a vibrant legacy as a leader of the Black Power and feminist movements. In the first biography of Kennedy, Sherie M. Randolph traces the life and political influence of this strikingly bold and controversial radical activist. Rather than simply reacting to the predominantly white feminist movement, Kennedy brought the lessons of Black Power to white feminism and built bridges in the struggles against racism and sexism. Randolph narrates Kennedy's progressive upbringing, her pathbreaking graduation from Columbia Law School, and her long career as a media-savvy activist, showing how Kennedy rose to founding roles in organizations such as the National Black Feminist Organization and the National Organization for Women, allying herself with both white and black activists such as Adam Clayton Powell, H. Rap Brown, Betty Friedan, and Shirley Chisholm. Making use of an extensive and previously uncollected archive, Randolph demonstrates profound connections within the histories of the new left, civil rights, Black Power, and feminism, showing that black feminism was pivotal in shaping postwar U.S. liberation

movements.

Momma And The Meaning Of Life-Irvin D. Yalom 2014-03-25 As the public grows disillusioned with therapeutic quick fixes, people are looking for a deeper psychotherapeutic experience to make life more meaningful and satisfying. What really happens in therapy? What promises and perils does it hold for them? No one writes about therapy - or indeed the dilemmas of the human condition - with more acuity, style, and heart than Irvin Yalom. Here he combines the storytelling skills so widely praised in *Love's Executioner* with the wisdom of the compassionate and fully engaged psychotherapist. In these six compelling tales of therapy, Yalom introduces us to an unforgettable cast of characters: Paula, who faces death and stares it down; Magnolia, into whose ample lap Yalom longs to pour his own sorrows; Irene, who learns to seek out anger and plunge into it. And there's Momma, old-fashioned, ill-tempered, who drifts into Yalom's dreams and tramples through his thoughts. At once wildly entertaining and deeply thoughtful, *Momma and the Meaning of Life* is a work of rare insight and imagination.

Attachment Theory in Practice-Susan M. Johnson 2019 Drawing on cutting-edge research on adult attachment--and providing an innovative roadmap for clinical practice--Susan M. Johnson argues that psychotherapy is most effective when it focuses on the healing power of emotional connection. The primary developer of emotionally focused therapy (EFT) for couples, Johnson now extends her attachment-based approach to individuals and families. The volume shows how EFT aligns perfectly with attachment theory as it provides proven techniques for treating anxiety, depression, and relationship problems. Each modality (individual, couple, and family therapy) is covered in paired chapters that respectively introduce key concepts and present an in-depth case example. Special features include instructive end-of-chapter exercises and reflection questions.

How To Stubbornly Refuse To Make Yourself Miserable About Anything-yes, Anything!,-Albert Ellis 2006-02-01 CLASSIC SELF-HELP FROM A RESPECTED PIONEER OF PSYCHOTHERAPY All of us worry about something, big or small, every day. But much of the emotional misery we feel is an overreaction, and it can be significantly reduced, using the techniques you'll find in this landmark book. World renowned therapist Dr. Albert Ellis, who created Rational-Emotive Behavior Therapy (REBT), believed that anger, anxiety, and depression are not only unnecessary, they're unethical, because when we allow ourselves to become emotionally upset, we're being unfair and unjust to ourselves. Thinking negative thoughts is a choice we can refuse to make. Applying the proven, time-tested principles of REBT is a simple, logical way to find true mental health and happiness. REBT acknowledges the power of emotions, but it also helps us understand which feelings are healthy and which are not. This classic book teaches you how to: *Retrain your brain to focus on the positive aspects of your life and face each obstacle without unnecessary despair *Control your emotional destiny *Refuse to upset yourself about upsetting yourself *Solve practical problems as well as emotional problems *Conquer the tyranny of "shoulds" ...and much more, providing all the tools you need to take back your life—and your happiness. If you can refuse to make yourself miserable, you're that much closer to making yourself happy—every day.

Race Traitor-Noel Ignatiev 2014-03-05 *Race Traitor* brings together voices ranging from tenured university professors to skinheads and prison inmates to discuss the "white question" in America. Working from the premise that the white race has been socially constructed, *Race Traitor* is a call for the disruption of white conformity and the formation of a New Abolitionism to dissolve it. In a time when white supremacist thinking seems to be gaining momentum, *Race Traitor* brings together voices ranging from tenured university professors to skinheads and prison inmates to discuss the "white question" in America. Through popular culture, current events, history and personal life stories, the essays analyze the forces that hold the white race together--and those that promise to tear it apart. When a critical mass of people come together who, though they look white, have ceased to act white, the white race will undergo fission and former whites will be able to take part in building a new human

community.

Dreamland-Bob Lazar 2019-10-15 Bob Lazar is the reason Area 51 became infamous in the 1980s and his recent appearance on Joe Rogan's podcast with 7 million listeners is credited with inspiring the Storm Area 51 phenomenon. In his DREAMLAND autobiography, Lazar reveals every detail of his highly controversial story about being an insider within the world's most legendary military research base. Bob Lazar was a brilliant young physicist that found himself employed at a top secret facility in the middle of the desert outside Las Vegas. Under the watchful eye of the government elite, he is tasked with understanding an exotic propulsion system being used by an advanced aerospace vehicle he is told came from outer space. The stressful work and long, odd hours start to wear on Bob and he becomes concerned for his safety. He tells his wife and a couple close friends about what he's doing in the desert, and his employers find out and are furious. When they station goons outside his house, Bob seeks help from wealthy UFOlogist, John Lear, who encourages Bob to take his story to award-winning investigative journalist George Knapp at KLAS-TV, a CBS affiliate. To prove he's telling the truth, Bob takes a group of people out into the desert to watch a test flight of the "flying saucer." On the way home, they are stopped by the police, who notify the base, and Bob loses his job. In a series of interviews with CBS TV, Bob Lazar then blows the lid off "Area 51," blows the whistle on the effort to conceal this craft from the American people, and blows up his career as a top physicist. Bob Lazar's reports have been the subject of intense controversy for decades. He has been interviewed numerous times and his story has been corroborated by other individuals he worked with and who were present when these events happened. But until now, Bob Lazar has never told his own story, in every detail in his own words, about those exciting days in the desert outside of Las Vegas and how the world came to learn about the experiments being conducted at Area 51.

1900-Ingersoll Lockwood 2021-04-02 That was a terrible night for the great City of New York--the night of Tuesday, November 3rd, 1896. The city staggered under the blow like a huge ocean liner which plunges, full speed, with terrific crash into a mighty iceberg, and recoils shattered and trembling like an aspen. The people were gathered, light-hearted and confident, at the evening meal, when the news burst upon them. It was like a thunder bolt out of an azure sky: "Altgeld holds Illinois hard and fast in the Democratic line. This elects Bryan President of the United States!" "Strange to say, the people in the upper portion of the city made no movement to rush out of their houses and collect in the public squares, although the night was clear and beautiful. They sat as if paralyzed with a nameless dread, and when they conversed it was with bated breath and throbbing hearts. In less than half an hour, mounted policemen dashed through the streets calling out: "Keep within your houses; close your doors and barricade them. The entire East side is in a state of uproar. Mobs of vast size are organizing under

the lead of Anarchists and Socialists, and threaten to plunder and despoil the houses of the rich who have wronged and oppressed them for so many years. Keep within doors. Extinguish all lights."

The Spinoza Problem-Irvin D. Yalom 2012-03-06 When sixteen-year-old Alfred Rosenberg is called into his headmaster's office for anti-Semitic remarks he made during a school speech, he is forced, as punishment, to memorize passages about Spinoza from the autobiography of the German poet Goethe. Rosenberg is stunned to discover that Goethe, his idol, was a great admirer of the Jewish seventeenth-century philosopher Baruch Spinoza. Long after graduation, Rosenberg remains haunted by this "Spinoza problem": how could the German genius Goethe have been inspired by a member of a race Rosenberg considers so inferior to his own, a race he was determined to destroy? Spinoza himself was no stranger to punishment during his lifetime. Because of his unorthodox religious views, he was excommunicated from the Amsterdam Jewish community in 1656, at the age of twenty-four, and banished from the only world he had ever known. Though his life was short and he lived without means in great isolation, he nonetheless produced works that changed the course of history. Over the years, Rosenberg rose through the ranks to become an outspoken Nazi ideologue, a faithful servant of Hitler, and the main author of racial policy for the Third Reich. Still, his Spinoza obsession lingered. By imagining the unexpected intersection of Spinoza's life with Rosenberg's, internationally bestselling novelist Irvin D. Yalom explores the mindsets of two men separated by 300 years. Using his skills as a psychiatrist, he explores the inner lives of Spinoza, the saintly secular philosopher, and of Rosenberg, the godless mass murderer.

TransArea-Ottmar Ette 2016-07-11 Ottmar Ette's TransArea proceeds from the thesis that globalization is not a recent phenomenon, but rather, a process of long duration that may be divided into four main phases of accelerated globalization. These phases connect our present, across the world's widely divergent modern eras, to the period of early modern history. Ette demonstrates how the literatures of the world make possible a tangible perception of that which constitutes Life, both of our planet and on our planet, which may only be understood through the application of multiple logics. There is no substitute for the knowledge of literature: it is the knowledge of life, from life. This English translation will be of great interest to English-speaking scholars in the fields of Global and Area Studies, Literary Studies, Cultural Studies, History, Political Science, and many more. About the author Ottmar Ette has been Chair of Romance Literature at the University of Potsdam, Germany, since 1995. He is Honorary Member of the Modern Language Association of America (MLA) (elected in 2014), member of the Berlin-Brandenburg Academy of Sciences and Humanities (elected in 2013), and regular member of the Academia Europaea (since 2010).

How the French Invented Love-Marilyn Yalom 2012-10-23 "Absolutely marvelous...lively and learned....Marilyn Yalom's book is a distinguished contribution to our experience of a great literature, as well as an endearing memoir." —Diane Johnson, author of *Lulu in Marrakech* and *Le Divorce* "[An] enchanting tour of French literature—from Abelard and Heloise in the 12th century to Marguerite Duras in the 20th and Philippe Sollers in the 21st." —Publishers Weekly (starred review) *How the French Invented Love* is an entertaining and masterful history of love à la française by acclaimed scholar Marilyn Yalom. Spanning the Middle Ages to the present, Yalom explores a love-obsessed culture through its great works of literature—from Moliere's comic love to the tragic love of Racine, from the existential love of Simone de Beauvoir and Jean-Paul Sartre to the romanticism of George Sand and Alfred de Musset. A thoroughly engaging homage to French culture and literature interlaced with the author's delicious personal anecdotes, *How the French Invented Love* is ideal for fans of Alain de Botton, Adam Gopnik, and Simon Schama.

The Soul of Care-Arthur Kleinman 2020-09-15 A moving memoir and an extraordinary love story that shows how an expert physician became a family caregiver and learned why care is so central to all our lives and yet is at risk in today's world. When Dr. Arthur Kleinman, an eminent Harvard psychiatrist and social anthropologist, began caring for his wife, Joan, after she was diagnosed with early-onset Alzheimer's disease, he found just how far the act of caregiving extended beyond the boundaries of medicine. In *The Soul of Care: The Moral Education of a Husband and a Doctor*, Kleinman delivers a deeply human and inspiring story of his life in medicine and his marriage to Joan, and he describes the practical, emotional and moral aspects of caretaking. He also writes about the problems our society faces as medical technology advances and the cost of health care soars but caring for patients no longer seems important. Caregiving is long, hard, unglamorous work--at moments joyous, more often tedious, sometimes agonizing, but it is always rich in meaning. In the face of our current political indifference and the challenge to the health care system, he emphasizes how we must ask uncomfortable questions of ourselves, and of our doctors. To give care, to be "present" for someone who needs us, and to feel and show kindness are deep emotional and moral experiences, enactments of our core values. The practice of caregiving teaches us what is most important in life, and reveals the very heart of what it is to be human.

Birth of the Chess Queen-Marilyn Yalom 2009-05-19 Everyone knows that the queen is the most dominant piece in chess, but few people know that the game existed for five hundred years without her. It wasn't until chess became a popular pastime for European royals during the Middle Ages that the queen was born and was gradually empowered to become the king's fierce warrior and protector. *Birth of the Chess Queen* examines the five centuries between the chess queen's timid emergence in the early days of the Holy Roman Empire to her elevation during the reign of Isabel of Castile. Marilyn Yalom, inspired by a handful of surviving medieval chess queens, traces their origin and spread from Spain, Italy, and Germany to France, England, Scandinavia, and Russia. In a lively and engaging historical investigation, Yalom draws parallels between the rise of the chess queen and the ascent of female sovereigns in Europe, presenting a layered, fascinating history of medieval courts and internal struggles for power.

Vices of My Blood-Maureen Jennings 2010-05-18 The compelling new novel by Canada's answer to Anne Perry. In his forties, the Reverend Charles Howard still cut an impressive figure. A married Presbyterian minister in Toronto's east end, Howard was popular with the congregation that elected him, especially with the ladies, and most particularly with Miss Sarah Dignam. Respected in the community, Howard, as Visitor for the House of Industry, sat in judgment on the poor, assessing their applications for the workhouse. But now Howard is dead, stabbed and brutally beaten by someone he invited into his office. His watch and boots are missing. Has some poor beggar he turned down taken his vengeance? Murdoch's investigation takes him into the arcane Victorian world of queer plungers — men who fake injury all the better to beg — and the destitute who had nowhere left to turn when they knocked on the Reverend Howard's door.

Creatures of a Day-Irvin D. Yalom 2015-02-24 "All of us are creatures of a day," wrote Marcus Aurelius, "rememberer and remembered alike." In his long-awaited new collection of stories, renowned psychiatrist Irvin D. Yalom describes his patients' struggles—as well as his own—to come to terms with the two great challenges of existence: how to have a meaningful life, and how to reckon with its inevitable end. In these pages, we meet a nurse, angry and adrift in a morass of misery where she has lost a son to a world of drugs and crime, and yet who must comfort the more privileged through their own pain; a successful businessman who, in the wake of a suicide, despairs about the gaps and secrets that infect every relationship; a newly minted psychologist whose study of the human condition damages her treasured memories of a lost friend; and a man whose rejection of philosophy forces even Yalom himself into a crisis of confidence. Their names and stories will linger long after the book's last page is turned. Like *Love's Executioner*, which established Yalom's preeminence as a storyteller illuminating the drama of existential therapy, *Creatures of a Day* is funny, earthy, and often shocking; it is a radically honest statement about the difficulties of human life, but also a celebration of some of the finest fruits—love, family, friendship—that life can bear. We are all creatures of a day. With Yalom as a guide, we can find in this book the means not just to make our own day bearable, but meaningful—and perhaps even joyful.

Darwin-Inspired Learning-Carolyn J. Boulter 2015-01-19 Charles Darwin has been extensively analysed and written about as a scientist, Victorian, father and husband. However, this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice. The ways in which Darwin developed his scientific ideas, and their far reaching effects, continue to challenge and provoke contemporary teachers and learners, inspiring them to consider both how scientists work and how individual humans 'read nature'. Darwin-inspired learning, as proposed in this international collection of essays, is an enquiry-based pedagogy, that takes the professional practice of Charles Darwin as its source. Without seeking to idealise the man, Darwin-inspired learning places importance on: • active learning • hands-on enquiry • critical thinking • creativity • argumentation • interdisciplinarity. In an increasingly urbanised world, first-hand observations of living plants and animals are becoming rarer. Indeed, some commentators suggest that such encounters are under threat and children are living in a time of 'nature-deficit'. Darwin-inspired learning, with its focus on close observation and hands-on enquiry, seeks to re-engage children and young people with the living world through critical and creative thinking modeled on Darwin's life and science.

How to be Assertive and Avoid Being Manipulated-Walter Riso 2013-06-01 When you are assertive, you are actively exercising and/or defending your rights: saying no, expressing disagreement, giving a contrary opinion and/or expressing concrete negative feelings without submissively allowing yourself to be manipulated or aggressively violating the rights of others. If you are afraid of hurting other people's feelings by being honest, if you are not able to express your anger or a conflicting opinion in a way that is socially acceptable, or if you feel

that others humiliate and manipulate you.

The High-Conflict Couple-Alan Fruzzetti 2006-12-03 You hear and read a lot about ways to improve your relationship. But if you've tried these without much success, you're not alone. Many highly reactive couples—pairs that are quick to argue, anger, and blame—need more than just the run-of-the-mill relationship advice to solve their problems in love. When destructive emotions are at the heart of problems in your relationship, no amount of effective communication or intimacy building will fix what ails it. If you're part of a "high-conflict" couple, you need to get control of your emotions first, to stop making things worse, and only then work on building a better relationship. The High-Conflict Couple adapts the powerful techniques of dialectical behavior therapy (DBT) into skills you can use to tame out-of-control emotions that flare up in your relationship. Using mindfulness and distress tolerance techniques, you'll learn how to deescalate angry situations before they have a chance to explode into destructive fights. Other approaches will help you disclose your fears, longings, and other vulnerabilities to your partner and validate his or her experiences in return. You'll discover ways to manage problems with negotiation, not conflict, and to find true acceptance and closeness with the person you love the most.

Inpatient Group Psychotherapy-Irvin D. Yalom 1983-05-11 In a book for front-line clinicians, Irvin Yalom turns to the inpatient psychiatric setting and offers new ways of conceptualizing the techniques of group therapy for use on acute wards. While some group therapy occurs in all psychiatric hospitals, it is rarely handled systematically and is not properly supported by the psychiatric leadership. Arguing from his own research results and from his years of experience, Yalom makes a strong case for the importance and efficacy of group therapy on all acute wards. "An eminently practical guide to what works".--Marc Hertzman, Dir., George Washington Univ. Medical Center. Notes, Appendix and Index.
