**Callings**-William C. Placher 2005-07-26 What am I going to do with my life? is a question that young people commonly face, while many not-so-young people continue to wonder about finding direction and purpose in their lives. Whether such purpose has to do with what job to take, whether to get married, or how to incorporate religious faith into the texture of their lives, Christians down the centuries have believed that God has plans for them. This unprecedented anthology gathers select passages on work and vocation from the greatest writers in Christian history. William Placher has written insightful introductions to accompany the selections — an introduction to each of the four main historical sections and a brief introduction to each reading. While the vocational questions faced by Christians have changed through the centuries, this book demonstrates how the distilled wisdom of these saints, preachers, theologians, and teachers remains relevant to Christians today. This rich resource is to be followed by a companion volume, edited by Mark R. Schwehn and Dorothy C. Bass, featuring texts drawn mainly from fiction, memoir, poetry, and other forms of literature. A study guide is available from Programs for the Theological Exploration of Vocation (PTEV) on their website.

**Tenacious of Their Liberties**-James Fenimore Cooper 2002-05 By examining the development of church government through the perspective of lay-clerical interchange. Cooper offers a fresh understanding of the sometimes noble, sometimes sordid, and sometimes rowdy nature of church politics. The study casts new light upon Anne Hutchinson and the "Antinomian Controversy," the Cambridge Platform, the Halfway Covenant, the Reforming Synod of 1679, and the long-standing debate over Puritan "declension." Cooper argues that in general church government did not divide Massachusetts culture along lay-clerical lines, but instead served as a powerful component of a popular religion and an ideology whose fundamentals were shared by churchgoers and most ministers throughout much of the colonial era.

**Writing Mathematically**-Candia Morgan 2002-01-04 School mathematics curricula internationally tend to emphasise problem-solving and have led to the development of opportunities for children to do maths in a more open, creative way. This has led to increased interest in 'performance-based' assessment, which involves children in substantial production of written language to serve as 'evidence' of their mathematical activity and achievement. However, this raises two important questions. Firstly, does this writing accurately present children’s mathematical activity and ability? Secondly, do maths teachers have sufficient linguistic awareness to support their students in developing skills and knowledge necessary for writing effectively in their subject area? The author of this book takes a critical perspective on these questions and, through an investigation of teachers’ readings and evaluations of coursework texts, identifies the crucial issues affecting the accurate assessment of school mathematics.

Access to global markets would provide the means to improve their standard of living, allowing them to take their places as independent nations in a modern world. Managing Modernity in the Western Pacific takes a broad sweep through contemporary topics in Melanesian anthropology and ethnography. With nuanced and rigorous scholarship, it views contemporary debate on modernity in Melanesia within the context of the global economy and cultural capitalism. In particular, contributors assess local ideas about wealth, success, speculation, and development and their connections to their connections to participation in institutions and activities generated by them.
