Students and instructors rely on the careful balance of accurate, current research and applications to the real lives of adolescents. The fully-revised eleventh edition includes a new chapter on health, expanded coverage of late adolescence, and more than 1200 research citations from the 21st century.

**Human Development: A Life-Span View**-Robert V. Kail 2015-01-01 Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable

students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. **Hergenhahn's An Introduction to the History of Psychology**-Tracy Henley 2018-01-01 For more than 30 years, numerous independent reviewers, student advice writers and even competitors have heralded HERGENHAHN'S AN INTRODUCTION TO THE HISTORY OF PSYCHOLOGY as the best in the field--and for good reason. It was the first History of Psychology text to include basic pedagogy--elements such as summaries and study questions that several current alternatives still lack. It engages students with interesting biographical

tidbits--the fun facts that readers fondly remember after other details fade. Grounded in original source material and contemporary scholarship, the book provides breadth and depth of analysis unrivaled by works of similar length. In the eighth edition, author Tracy Henley continues to demonstrate that most of the concerns of contemporary psychologists are manifestations of themes that have been part of Psychology for hundreds--or even thousands--of years. **Posthumanism**-Stefan Herbrechter 2013-08-01 What does it mean to be human today? The answer to this question, which is as old as the human species itself, is becoming less and less certain. Current technological developments increasingly erode our traditional humanist reflexes: consciousness, emotion, language, intelligence, morality, humour, mortality - all these no longer demonstrate the unique character and value of human existence. Instead, the spectre of the 'posthuman' is now being widely invoked as the 'inevitable' next evolutionary stage that humans are facing. Who comes after the human? This is the question that posthumanists are taking as their starting point. This critical introduction understands posthumanism as a discourse, which, in principle, includes everything that has been and is being said about the figure of the 'posthuman'. It outlines the genealogy of the various

posthuman 'scenarios' in circulation and engages with their theoretical and philosophical assumptions and social and political implications. It does so by connecting the philosophical debate about the future of humanity with a range of texts, including examples from new media, popular culture, science and the media.

**Callings**-William C. Placher  
2005-07-26 What am I going to do with my life? is a question that young people commonly face, while many not-so-young people continue to wonder about finding direction and purpose in their lives. Whether such purpose has to do with what job to take, whether to get married, or how to incorporate religious faith into the texture of their lives, Christians down the centuries have believed that God has plans for them. This unprecedented anthology gathers select passages on work and vocation from the greatest writers in Christian history. William Placher has written insightful introductions to accompany the selections — an introduction to each of the

four main historical sections and a brief introduction to each reading. While the vocational questions faced by Christians have changed through the centuries, this book demonstrates how the distilled wisdom of these saints, preachers, theologians, and teachers remains relevant to Christians today. This rich resource is to be followed by a companion volume, edited by Mark R. Schwehn and Dorothy C. Bass, featuring

texts drawn mainly from fiction, memoir, poetry, and other forms of literature. A study guide is available from Programs for the Theological Exploration of Vocation (PTEV) on their website.
