Above the Arctic Circle-Jame A. Carroll

2015-04-07 Above the Arctic Circle transports the reader back in time to the Alaska of 1911 into the Athabaskan Indian village of Fort Yukon and beyond. It was a time when travel was by trail or river on routes shared by man and wild beast, when communication reached only as far as the echo of one's voice, and when the first order of each new day was survival in the face of unyielding natural elements. This is the time and place chronicled in the personal journals of James A. Carroll: explorer, pioneer, dogsled musher, trapper, trader, husband, and father. It is an authentic first-hand account of a young man's first decade in the territory of Alaska, a straightforward telling of the adversity and adventures of life on the far north frontier. This story, told with honesty and more than a little humor, offers a kind of kinship connecting author and reader thereby extending a personal invitation to take the journey north through time with James A. Carroll -- Above the Arctic Circle.

Call of the Wraith-Kevin Sands 2018-09-25

Christopher Rowe is back and there are more puzzles, riddles, and secrets to uncover in this fourth novel of the award-winning Blackthorn Key series. Christopher Rowe has no idea who he is. After being shipwrecked in Devonshire, he wakes up alone, his memories gone. Villagers tell him he was possessed by an unseen evil, and only became conscious after being visited by the local witch. As Christopher tries to get his bearings, he realizes his current state may be far from coincidence. Dark events have been happening in this corner of Britain—village children are

disappearing without a trace. There are whispers that the malevolent ghost of the White Lady has returned to steal the children away, one by one, and consume their souls. Thankfully, friends Tom and Sally find Christopher and help him reconnect with his unique skills and talents, even as his memories elude him. But as motives and secrets are revealed, Christopher finds himself in a desperate race to reclaim his memories and discover the missing children before it's too late.

Air Pictorial- 1998

The Blackthorn Key-Kevin Sands 2015-09 In 1665 London, fourteen-year-old Christopher Rowe, apprentice to an apothecary, and his best friend, Tom, try to uncover the truth behind a mysterious cult, following a trail of puzzles, codes, pranks, and danger toward an unearthly secret with the power to tear the world apart.

Schooling for Sustainable Development in Europe-Rolf Jucker 2014-10-27

This book examines the implementation of Education for Sustainable Development (ESD) programs in schools across Europe. It describes and analyzes how individual countries and the region as a whole have established teaching and learning methods to help students develop the competencies needed to be part of a sustainable society. Featuring chapters written by experts throughout Europe, the book first provides a general overview of ESD in various contexts, including the state-of-the-art of ESD theory and conceptual development; political and social analysis; the various concepts of ESD competencies; and teacher training. Next, the book details how ESD has been implemented in different European countries and regions, including: Sweden, Italy, Germany, Austria, Switzerland, Catalonia, Hungary, Finland,

Norway, Denmark, Flanders, France, Cyprus, UK and the Netherlands. In recognition of education as a motor of change, the United Nations General Assembly declared a Decade of Education for Sustainable Development (2005-2014), calling for the integration of sustainable development into all aspects of education and learning. Inside this book, readers will find details on what has been done, as well as assessments of what more could be done, across Europe. It will help readers gain valuable insights into how to help students develop the knowledge, skills and values needed to shape a sustainable future.

"The" Illustrated London News- 1852

The Invisible War-David Tavaréz 2011-02-14
After the conquest of Mexico, colonial authorities attempted to enforce Christian beliefs among indigenous peoples—a project they envisioned as spiritual warfare. *The Invisible War* assesses this immense but dislocated project by examining all known efforts in Central Mexico to obliterate native devotions of Mesoamerican origin between the 1530s and the late eighteenth century. The author's innovative interpretation of these efforts is punctuated by three events: the creation of an Inquisition tribunal in Mexico in 1571; the native rebellion of Tehuantepec in 1660; and the emergence of eerily modern strategies for isolating idolaters, teaching Spanish to natives, and obtaining medical proof of sorcery from the 1720s onwards. Rather than depicting native devotions solely from the viewpoint of their colonial codifiers, this book rescues indigenous perspectives on their own beliefs. This is achieved by an analysis of previously unknown or rare ritual texts that circulated in secrecy in Nahua and Zapotec communities through an astute appropriation of European literacy. Tavaréz contends that native responses gave rise to a colonial archipelago of faith in which local cosmologies merged insights from Mesoamerican and European beliefs. In the end, idolatry eradication inspired distinct reactions: while Nahua responses focused on epistemological dissent against Christianity, Zapotec strategies privileged confrontations in defense of native cosmologies.

Sounds and Sweet Airs-Anna Beer 2016-04-07 A companion to the Classic FM series Francesca Caccini. Barbara Strozzi. Élisabeth Jacquet de la Guerre. Marianna Martines. Fanny Hensel. Clara Schumann. Lili Boulanger. Elizabeth Maconchy. Since the birth of classical music, women who dared compose have faced a bitter struggle to be heard. In spite of this, female composers continued to create, inspire and challenge. Yet even today so much of their work languishes unheard. Anna Beer reveals the highs and lows experienced by eight composers across the centuries, from Renaissance Florence to twentieth-century London, restoring to their rightful place exceptional women whom history has forgotten.

Edinburgh-Robert Stevenson 2018-02-20 The ancient and famous metropolis of the North sits overlooking a windy estuary from the slope and summit of three hills. No situation could be more commanding for the head city of a kingdom; none better chosen for noble prospects. From her tall precipice and terraced gardens she looks far and wide on the sea and broad campaigns. To the east you may catch at sunset the spark of the May lighthouse, where the Firth expands into the German Ocean; and away to the west, over all the carse of Stirling, you can see the first snows upon Ben Ledi.

Critical Care-Angelika Fitz 2019-04-30 How architecture and urbanism can help to care for and repair a broken planet: essays and illustrated case studies. Today, architecture and urbanism are capital-centric, speculation-driven, and investment-dominated. Many cannot afford housing. Austerity measures have taken a disastrous toll on public infrastructures. The climate crisis has rendered the planet vulnerable, even uninhabitable. This book offers an alternative vision in architecture and urbanism that focuses on caring for a broken planet.

Rooted in a radical care perspective that always starts from the given, in the midst of things, this edited collection of essays and illustrated case studies documents ideas and practices from an extraordinarily diverse group of contributors. Focusing on the three crisis areas of economy, ecology, and labor, the book describes projects including village reconstruction in China; irrigation in Spain; community land trust in Puerto Rico; revitalization of modernist public housing in France; new alliances in informal settlements in Nairobi; and the redevelopment of traditional building methods in flood areas in Pakistan. Essays consider such topics as ethical architecture, land policy, creative ecologies, diverse economies, caring communities, and the exploitation of labor. Taken together, these case studies and essays provide evidence that architecture and urbanism have the capacity to make the planet livable, again. Essays by Mauro Baracco, Sara Brolund de Carvalho, Jane Da Mosto, Angelika Fitz, Hélène Frichot, Katherine Gibson, Mauro Gil-Fournier Esquerra, Valeria Graziano, Gabu Heindl, Elke Krasny, Lisa Law, Ligia Nobre, Meike Schalk, Linda Tegg, Ana Carolina Tonetti, Kim Trogal, Joan C. Trends in Teaching and Learning of Mathematical Modelling-Gabriele Kaiser 2011-06-23 This book contains suggestions for and reflections on the teaching, learning and assessing of mathematical modelling and

applications in a rapidly changing world, including teaching and learning environments. It addresses all levels of education from universities and technical colleges to secondary and primary schools. Sponsored by the International Community of Teachers of Mathematical Modelling and Applications (ICTMA), it reflects recent ideas and methods contributed by specialists from 30 countries in Africa, the Americas, Asia, Australia and Europe. Inspired by contributions to the Fourteenth Conference on the Teaching of Mathematical Modelling and Applications (ICTMA14) in Hamburg, 2009, the book describes the latest trends in the teaching and learning of mathematical modelling at school and university including teacher education. The broad and versatile range of topics will stress the international state-of-the-art on the following issues: Theoretical reflections on the teaching and learning of modelling Modelling competencies Cognitive perspectives on modelling Modelling examples for all educational levels Practice of modelling in school and at university level Practices in Engineering and Applications

Abrupt Climate Change-National Research Council 2002-04-23 The climate record for the past 100,000 years clearly indicates that the climate system has undergone periodic--and often extreme--shifts, sometimes in as little as a decade or less. The causes of abrupt climate changes have not been clearly established, but the triggering of events is likely to be the result of multiple natural processes. Abrupt climate changes of the magnitude seen in the past would have far-reaching implications for human society and ecosystems, including major impacts on energy consumption and water supply demands. Could such a change happen again? Are human activities exacerbating the likelihood of abrupt climate change? What are the potential societal consequences of such a change? *Abrupt Climate Change: Inevitable Surprises* looks at the current scientific evidence and theoretical understanding to describe what is currently known about abrupt climate change, including patterns and magnitudes, mechanisms, and probability of occurrence. It identifies critical knowledge gaps concerning the potential for future abrupt changes, including those aspects of change most important to society and economies, and outlines a research strategy to close those gaps. Based on the best and most current research available, this

A Companion to Latin American Anthropology

Poole 2008-05-19

Comprised of 24 newly commissioned chapters, this defining reference volume on Latin America introduces English-language readers to the debates, traditions, and sensibilities that have shaped the study of this diverse region. Contributors include some of the most prominent figures in Latin American and Latin Americanist anthropology. Offers previously unpublished work from Latin America scholars that has been translated into English explicitly for this volume. Includes overviews of national anthropologies in Mexico, Cuba, Peru, Argentina, Ecuador, Bolivia, Colombia, and Brazil, and is also topically focused on new research. Draws on original ethnographic and archival research. Highlights national and regional debates. Provides a vivid sense of how anthropologists often combine intellectual and political work to address the pressing social and cultural issues of Latin America.

Imagining the Internet

Janna Quitney Anderson 2005-07-21 In the early 1990s, people predicted the death of privacy, an end to the current concept of 'property,' a paperless society, 500 channels of high-definition interactive television, world peace, and the extinction of the human race after a takeover engineered by intelligent machines. Imagining the Internet zeroes in on predictions about the Internet's future and revisits past predictions—and how they turned out. It gives the history of communications in a nutshell, illustrating the serious impact of pervasive networks and how they will change our lives over the next century.

Mathematics, Education and History

Kathleen M. Clark 2018-03-30 This book includes

18 peer-reviewed papers from nine countries, originally presented in a shorter form at TSG 25 The Role of History of Mathematics in Mathematics Education, as part of ICME-13 during. It also features an introductory chapter, by its co-editors, on the structure and main points of the book with an outline of recent developments in exploring the role of history and epistemology in mathematics education. It serves as a valuable contribution in this domain, by making reports on recent developments in this field available to the international educational community, with a special focus on relevant research results since 2000. The 18 chapters of the book are divided into five interrelated parts that underlie the central issues of research in this domain: 1. Theoretical and conceptual frameworks for integrating history and epistemology in mathematics in mathematics education; 2. Courses and didactical material: Design, implementation and evaluation; 3. Empirical investigations on implementing history and epistemology in mathematics education; 4. Original historical sources in teaching and learning of and about mathematics; 5. History and epistemology of mathematics: Interdisciplinary teaching and sociocultural aspects. This book covers all levels of education, from primary school to tertiary education, with a particular focus on teacher education. Additionally, each chapter refers to and/or is based on empirical research, in order to support, illuminate, clarify and evaluate key issues, main questions, and conjectured theses raised by the authors or in the literature on the basis of historical-epistemological or didactical-cognitive arguments.

The Romani Women's Movement

Angéla Kóczé 2018-07-17

The lack of recognition of Romani gender politics in the wider Romani movement and the women's movements is accompanied by a scarcity of academic literature on Romani women's mobilization in wider social justice struggles and debates. The Romani Women's Movement highlights the role that Romani women's politics plays in shaping equality related discourses, policies, and movements in Central, Eastern and South-Eastern Europe. Presenting the diverse experiences and voices of Romani women activists, this volume reveals how they translate experiences of structural inequalities into political struggles by defining their own spaces of action; participating in formalized or less formal

activist practices, and challenging the agendas and mechanisms of the established Romani and women's movements. Moving discourses on and of Romani women from the periphery of scholarly exchanges to the mainstream, the volume invites scholars and activists from different disciplines and movements to critically reflect on their engagements with particular social justice agendas. It will appeal to students, researchers and practitioners interested in fields such as social movements, gender equality, and social and ethnic justice.

Contemporary Hispanic Crime Fiction-G.

Close 2016-04-30 This study examines representations of the cityscape and of a so-called "new urban violence" in both detective-centered and detectiveless crime fiction produced in Spanish America and Spain during recent decades. It documents the emergence and permutations of this production as an index not only of local perceptions of contemporary urban experience and of a contemporary urban "ecology of fear," but also as a transnational index of the globalization of literary forms and markets. It centers on the inscription of urban space in novels set in the metropolitan centers of the Hispanic World: Mexico City, Bogota, Buenos Aires, and Barcelona.

The Undying Thing (Fantasy and Horror Classics)-Barry Pain

2012-10-19 Barry Pain was a prolific and popular mystery and horror writer whose career spanned forty years. Though somewhat neglected in his day, he is now seen as an important writer, and a great inspiration for authors such as H. P. Lovecraft. Many of the earliest and most interesting vampire stories, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

CLIL-Do Coyle 2010-04-01 CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and English language schools across Europe, this book gives a comprehensive overview of CLIL. It

summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all.

Classroom-Based Evaluation in Second Language Education-Fred Genesee

1996-08-13 Classroom-based Evaluation in Second Language Education has been written to help foreign and second language educators in planning and carrying out effective and comprehensive evaluations in their classrooms. The book emphasizes the value of classroom-based assessment as a tool for improving both teaching and learning. The presentation is non-technical and does not require a specialized background in psychometrics, statistics, or research. The suggested assessment procedures are useful for a broad range of proficiency levels, teaching situations, and instructional approaches. Preview questions and follow-up activities assist the reader in applying the material discussed in each chapter.

America's Climate Choices-National Research Council 2011-06-11 Climate change is occurring. It is very likely caused by the emission of greenhouse gases from human activities, and poses significant risks for a range of human and natural systems. And these emissions continue to increase, which will result in further change and greater risks. America's Climate Choices makes the case that the environmental, economic, and humanitarian risks posed by climate change indicate a pressing need for substantial action now to limit the magnitude of climate change and to prepare for adapting to its impacts. Although there is some uncertainty about future risk, acting now will reduce the risks posed by climate change and the pressure to make larger, more rapid, and potentially more expensive reductions later. Most actions taken to reduce vulnerability to climate change impacts are common sense investments that will offer protection against natural climate variations and extreme events. In addition, crucial investment decisions made now about equipment and infrastructure can "lock in" commitments to greenhouse gas emissions for decades to come. Finally, while it may be possible to scale back or reverse many responses to climate change, it is difficult or impossible to "undo" climate change, once manifested. Current efforts of local, state, and private-sector actors are important, but not likely to yield progress comparable to what could be achieved with the addition of strong federal policies that establish

coherent national goals and incentives, and that promote strong U.S. engagement in international-level response efforts. The inherent complexities and uncertainties of climate change are best met by applying an iterative risk management framework and making efforts to significantly reduce greenhouse gas emissions; prepare for adapting to impacts; invest in scientific research, technology development, and information systems; and facilitate engagement between scientific and technical experts and the many types of stakeholders making America's climate choices.

Latino Boxing in Southern California-Gene Aguilera 2018 Southern California, with its burgeoning Latino population, marked the spot as the proving ground for world-class boxers from Mexico, Puerto Rico, Cuba, Panama, Nicaragua, and El Salvador to showcase their talent with exciting and unforgettable bouts. Latino Boxing in Southern California tells the true, heartfelt stories of Latino and Mexican ring idols who did battle on the West Coast, while exploring the mythical devotion boxing purists and fans have for their boxers. This colorful tribute to the sweet science, Los Angeles-style, keeps the memory alive of when boxing in this town revolved around the beloved Olympic Auditorium, Main St. Gym, and the Forum.
